

# Portable Table Top Gas Cooker

Model: BS100s

**Unique Features for Safe Use Indoors or Out**

Sensors cut gas flow unless flame is lit

Self-eject mechanism assures safe use of gas

Placement protection; cartridge must be aligned correctly to activate keyway

Reverse spill tray protection; spill tray must be in upright position to engage gas cartridge

Only use gas appliances in well ventilated areas

## The new BS100s is all about functionality and safety

The BS100s is the safest, most efficient, most controllable portable gas cooker yet.

Redesigned pan support lifts the cooking pan for improved even heating. A new burner gives more control without power loss. The new BS100s has been fully tested with larger pans commonly used in Holland and Belgium. The BS100s has a redesigned pressure switch and insulation meeting all international standards for failsafe cartridge safety.

Tested for use inside and outdoors.

Stable design – suits pots, pans and kettles with up to 20cm/8” base

Double-ring vortex burner for balanced fuel/air mix for steady heat

Flame-protection collar for steady (Consistent?) heat, even in windy weather

Piezo ignition

Each A4 Butane Battery® lasts 90 minutes on high and up to 4 hours on simmer
